

Sarthak Ahuja

Full Stack Software Developer

Jaipur, Rajasthan sarthakahuja168@gmail.com +91 9314447933

sarthak-sa-portfolio.netlify.app github.com/Sarthak-sa

Professional Summary

Full Stack Software Developer with 3+ years of experience building scalable web applications, secure backend services, and automation-driven system integrations using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**. Specialized in **OAuth 2.0-based authentication and authorization, REST API design**, containerized deployments with **Docker** and **GitHub Actions** CI/CD pipelines, and third-party enterprise integrations including Salesforce, Jira, Slack, and calendar platforms. Skilled in end-to-end feature ownership, workflow automation, cloud-based deployment, and mentoring junior developers.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS, Bash, Python

Backend & Frameworks: Node.js, Express.js, React.js, REST API Design, WebSocket.io

Authentication & Security: OAuth 2.0, JWT, Role-Based Access Control (RBAC)

Databases & Caching: MongoDB, PostgreSQL, Redis

DevOps & Deployment: Docker, GitHub Actions, CI/CD Pipelines, Netlify, Render, Heroku

Integrations & Automation: Salesforce, Jira, Slack, Google Calendar, Outlook Calendar, n8n, Webhooks

UI & UX: GSAP, Bootstrap, TailwindCSS, Material UI

Tools & Platforms: Git, GitHub, Jekyll, Jest, SuperTest, PgAdmin, Figma, VS Code, Postman

Practices: Unit Testing, Code Review, Agile Collaboration, CI/CD Automation

Professional Experience

Software Developer, Enbraun Technologies

Jun 2023 – Present –

- Implemented secure **OAuth 2.0 authentication flows** for third-party integrations including Salesforce, Google Calendar, and Outlook Calendar, managing access tokens, refresh cycles, and permission scopes across **5+ integrated services**.
- Designed and developed enterprise-level integrations with **Salesforce, Jira, Slack, Google Calendar, and Outlook Calendar**, enabling seamless cross-platform workflows for **30+ internal teams**.
- Containerized internal services using **Docker** and configured **GitHub Actions CI/CD pipelines**, streamlining build and deployment processes and reducing release turnaround time.
- Automated Jira issue events and synchronized them with the eResource Scheduler system, reducing manual operational effort by **60% (~10 hours per week)**.
- Built robust mappings between Salesforce cases and internal project management workflows, improving real-time project visibility and cutting status-update turnaround by **40%**.
- Integrated real-time Slack notifications using event-driven architecture, reducing alert response/latency time by **70%**.
- Developed a **custom n8n node** adopted across **15+ internal automation workflows**, cutting manual orchestration effort by **50%**.
- Built and deployed an open-source analytics dashboard using Metabase, enabling visibility into **25+ SaaS operational metrics** for stakeholders.
- Mentored and managed **two interns**, conducting code reviews, task planning, and technical guidance, improving intern PR turnaround time by **30%**.

Web Developer Intern, Enbraun Technologies

Jan 2023 – May 2023 –

- Maintained and enhanced the company website using HTML, CSS, Jekyll, and Bootstrap.
- Automated blog publishing by developing a **Bash-based content pipeline** that converts Word documents into Jekyll-formatted HTML, cutting publishing time by **80%**.
- Revamped feature pages to improve content clarity, UX, and conversion rates by **15%**.
- Implemented smooth scroll-based animations using **GSAP** to enhance user engagement.
- Improved website performance by **35%** and SEO metrics, resulting in a **20%** increase in organic traffic.

Projects

Chat Wave (Live – deployed on Render)

React.js, Node.js, Express.js, MongoDB, Socket.io, JWT

Full-stack real-time chat application featuring JWT-based authentication, WebSocket-powered messaging, draggable chat UI, and responsive design. Supports **100+ concurrent users** with sub-**200ms** message delivery latency.

Shirt Decoy (Live – deployed on Netlify)

React.js, Three.js, WebGL

3D product customization platform allowing real-time texture, color, and logo customization on a 3D garment model, with **10,000+** customization combinations and optimized render performance.

Education

Bachelor of Computer Applications

Aug 2020 – Apr 2023

ICFAI University, Jaipur

CGPA: 6.8

Languages

English, Hindi
