

Sarthak Ahuja

Software Developer

Jaipur, Rajasthan sarthakahuja168@gmail.com +91 7568113180 Portfolio GitHub

Professional Summary

Software Developer with 3+ years of experience in building scalable web applications, secure backend services, and automation-driven system integrations. Strong expertise in MERN stack, **OAuth 2.0–based authentication and authorization**, and third-party integrations including Salesforce, Jira, Slack, and calendar platforms. Proven ability to own features end-to-end, optimize operational workflows, and mentor junior developers.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS, Bash, Python (Basics)

Backend & Frameworks: Node.js, Express.js, React.js

Authentication & Security: OAuth 2.0, JWT, Role-Based Access Control (RBAC)

Databases & Caching: MongoDB, PostgreSQL, Redis

Integrations & Automation: Salesforce, Jira, Slack, Google Calendar, Outlook Calendar, n8n

UI & UX: GSAP, Bootstrap, TailwindCSS, Material UI

Tools & Platforms: Git, Jekyll, Jest, SuperTest, PgAdmin, Figma, VS Code

Other: REST APIs, WebSocket.io, node-cron

Professional Experience

Software Developer, Enbraun Technologies

Jun 2023 – Present –

- Implemented secure **OAuth 2.0 authentication flows** for third-party integrations including Salesforce, Google Calendar, and Outlook Calendar, managing access tokens, refresh cycles, and permission scopes.
- Designed and developed enterprise-level integrations with **Salesforce, Jira, Slack, Google Calendar, and Outlook Calendar**, enabling seamless cross-platform workflows.
- Automated Jira issue events and synchronized them with the eResource Scheduler system, significantly reducing manual operational effort.
- Built robust mappings between Salesforce cases and internal project management workflows to improve real-time project visibility.
- Integrated real-time Slack notifications using event-driven architecture for operational alerts.
- Developed a **custom n8n node** to support internal automation workflows and third-party system orchestration.
- Built and deployed an open-source analytics dashboard using Metabase to analyze and visualize SaaS operational data.
- Mentored and managed **two interns**, conducting code reviews, task planning, and technical guidance.

Web Developer Intern, Enbraun Technologies

Jan 2023 – May 2023 –

- Maintained and enhanced the company website using HTML, CSS, Jekyll, and Bootstrap.
- Automated blog publishing by developing a **Bash-based content pipeline** that converts Word documents into Jekyll-formatted HTML ready for deployment.
- Revamped feature pages to improve content clarity, user experience, and conversion rates.
- Implemented smooth scroll-based animations using **GSAP** to enhance user engagement.
- Improved website performance by 35% and SEO metrics, resulting in a 20% increase in organic traffic.

Projects

Chat Wave (Live)

Full-stack real-time chat application featuring JWT-based authentication, WebSocket-powered messaging, draggable chat UI, and responsive design.

Shirt Decoy (Live)

3D product customization platform built with React.js and Three.js allowing real-time texture, color, and logo customization.

Education

Bachelor of Computer Applications

Aug 2020 – Apr 2023

ICFAI University, Jaipur

CGPA: 6.8

Languages

English, Hindi
